

# N2N SERVICES INC OVERVIEW

## PROFESSIONAL SERVICES

N2N's roots are in professional services. N2N's experienced technical services team members have expertise in many disciplines and have experience in working with a broad range of products. We provide consulting services and technical and product support in the areas of:

- Systems administration
- Database administration
- Systems Integration
- Functional and Technical consulting
- Mobile applications
- Analytics

Specifically, N2N specializes in higher education Student Information Systems (SIS) and offer both functional and technical consulting services to support Ellucian Banner®, ODS, EDW, BDMS, Workflow, Luminis, and Oracle PeopleSoft Campus Solutions®.

Beyond SIS integration know-how, N2N's subject matter experts are ready to assist clients with the implementation, support and training for applications such as Cognos, Argos, Tableau, and other common "commercial off the shelf" (COTS) products and solutions for higher education.

**integration solutions**

**that help institutions**

**of learning realize**

**the power of data.**

N2N, based in Atlanta, GA, is the leader in systems integration for Higher Education. N2N's Illuminate is a turnkey Integration Platform as a Service (iPaaS) provides integration solutions for higher education. Our affordable integration platform is used by institutions to support workflow automation, student engagement, predictive analytics and comprehensive student success.

N2N's Professional Services Team works with educational institutions faculty and staff to ensure that they get the IT services they need and deserve to achieve their goals and to fulfill their mission to serve students.

### Technical Consulting Services

#### Systems Integrations, Development & Managed Systems Services

Improve Functionality, automate processes and optimize performance, while discovering the benefits of aligning technology with organizational business objectives, by contracting with N2N's Professional Services Team.

### Functional Consulting Services

#### Business Intelligence, Business Process Analysis and Architecture Consulting

Improve performance and reduce overhead by contracting with our highly-skilled techno-functional consulting team for all your business intelligence, business processes analysis (BPA) and data/enterprise architecture needs.

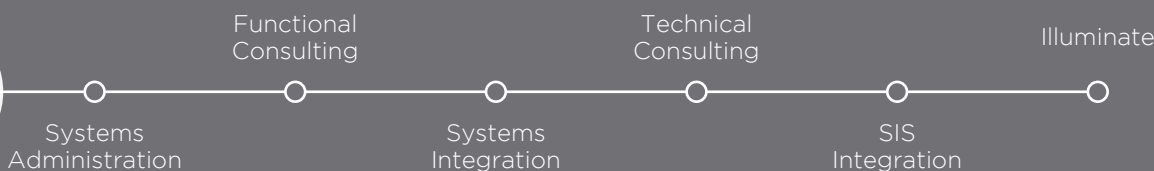

Integrating SaaS products into an institution's data systems with batch files, scripts and customized applications can be a resources intensive and costly endeavor for your institution.

N2N's Professional Services Team can help your institution control capital outlays, reduce downtime, and bolster security so your institution can focus on moving forward and supporting student success.

**SUCCESS STORIES**

## Professional Services

The proliferation of SaaS products and mobile app integration at higher education institutions around the world is overwhelming CIOs and their IT departments. The backlog, time and costs to satisfy this burgeoning demand in a competitive, budget constrained ecosystem are enormous and growing. Typically, an institution with 5000 students spends \$200,000 annually to maintain, build and support new third-party integrations. Institutions are now being challenged to move their on-premise SIS to the cloud. This complicated and costly migration of data to the cloud warrants that institutions reengineer all

the integrations they have developed over the last decade.

N2N's Illuminate is an Integration Platform as a Service (iPaaS) that not only supports educational institutions' current needs, it also prepares them for the "Internet of Things" world.

Contact us today to learn how our Professional Services Team and Illuminate, our integration software suite, can support your institution's goals.
